Introduction

This project, conducted as part of the Software Testing (QA) course, focused on the **Steimatzky** website, one of the largest and most central online bookstores in Israel. **My main goal was to thoroughly check the site's stability and functions, with special attention to the full user experience, mirroring the workflow of a professional QA team.**

The project covered all the major, critical touchpoints of the customer journey. I checked the Search Engine and navigation, the secure Login process, managing the Personal Account, and, most importantly, the entire purchasing process: from adding items to the Shopping Cart to the final Payment. I also made sure special features like Gift Cards worked correctly.

I managed all defect tracking using standard industry tools. I used the **Jira** system to log and manage all discovered bugs, which were sorted by their impact and clearly categorized as **Show Stopper, Critical, Major, Medium or Low**. Additionally, I used **TestRail** to organize all my test cases and monitor their status. I also utilized **AI** tools to accelerate initial research and optimize my testing strategy.

A significant part of the work focused on the user's view. **My background in UX/UI** provided the framework to analyze the system with a broad, systemic view. Accordingly, I checked the **GUI (Graphical User Interface)** for visual consistency and reviewed the overall **Usability** to ensure the site was user-friendly and intuitive. Furthermore, I verified full **compatibility** across all devices, checking performance perfectly on both **Mobile** phones and desktop computers. Essential **Security Testing** was also performed to ensure user data protection.

I finished the project by writing a detailed **Software Test Report (STR)**. This report summarizes all testing activities, lists the key problems I found, and provides clear, helpful recommendations for how to improve the site. This process proved the critical importance of thorough QA methodology in delivering a high-quality, reliable website.

About Steimatzky

Steimatzky is recognized as the **largest and oldest bookstore chain in Israel**, founded in 1925. The brand has evolved from a local physical bookstore to a comprehensive retail group that defines and enriches Israeli culture.

- **Scale and Scope:** The company operates over 100 physical branches across Israel. Beyond its core offering of books in Hebrew and foreign languages, the chain sells a wide range of complementary products, including games, and gift items .
- **Digital Transformation:** Steimatzky has invested heavily in developing its online presence. The website, **Steimatzky.co.il**, serves as the company's central e-commerce platform, enabling customers from across Israel and globally to access its vast catalog and services easily.
- **Target Audience:** The platform serves a massive and diverse customer base, including a highly engaged **customer loyalty club** that numbers over 450,000 members , who receive unique benefits and promotions.
- **Strategic Vision:** Steimatzky's digital strategy focuses on blending its cultural heritage with cutting-edge e-commerce technology and strong logistics to provide a seamless, reliable shopping experience.

Given its market leadership and the high volume of traffic and transactions, the Steimatzky website demands exceptional stability and functionality. This STR project aims to validate the platform's performance across critical user flows (search, login, cart, payment) and core non-functional requirements (security, usability, and compatibility), ensuring it meets the expectations of a leading national e-commerce brand.

Key Testing Types Applied 🧑

The project included the following core testing types to ensure the Steimatzky website's quality:

Functional Testing ✓: I confirmed every feature, such as **Login** and the **Payment** process, performs correctly and as expected.

End-to-End (E2E) Testing 🚧: I verified that the entire customer journey, from **Search** to final purchase, works together seamlessly without errors.

Regression Testing 🔄: I ensured that system updates and bug fixes **did not break** any existing, critical functionality that was previously working.

UI (User Interface) Testing 💻: I checked that all **visual elements** and the **GUI** were consistent, clear, and displayed correctly across the site.

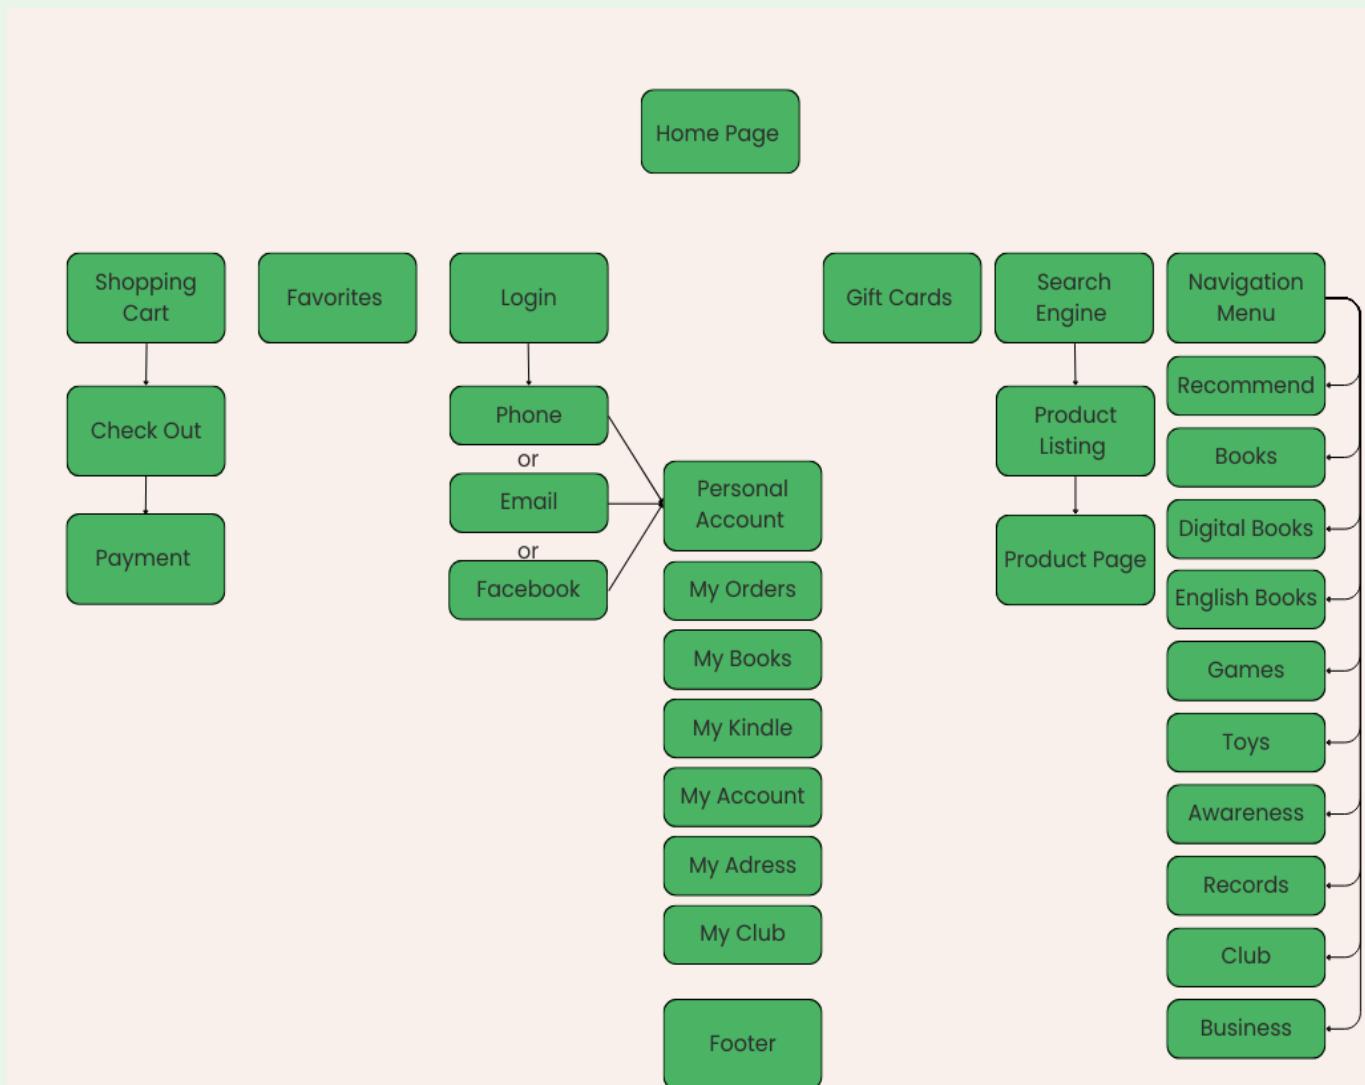

Usability Testing ⭐: I evaluated **how easy and intuitive** the site was to use, focusing on simple navigation and minimizing customer confusion.

Compatibility Testing 📱: I ensured the website **looked and worked perfectly** on both **Mobile** phones and desktop computers, maintaining a consistent experience.

Security Testing 🔒: I checked basic protection for **customer data** and sensitive areas like the **Payment** page to prevent clear security flaws.

Is The Product Ready For Release?

Following the completion of the testing process for the Steimatzky website, it is possible to present an accurate status of the product's readiness for release.

During the testing phase, a total of **324** test cases were documented. Of these, **303 passed successfully**, indicating a high level of system stability. A total of **18 test cases failed**, and **3 test cases were not executed** (see Test Status Summary).

In parallel, a severity assessment was conducted for the **19 bugs** identified during testing. The bugs were classified as follows (see chart):

- **Show Stopper:** 0 bugs were found.
- **Critical:** 1 bug was found, located specifically in the **Payment** area.
- **Major:** 4 bugs were classified as Major.
- **Medium:** 8 bugs were classified as Medium.
- **Low:** 6 bugs were classified as Low.

Based on these results, the product demonstrates a high level of stability, with most test cases passing successfully. While no Show Stopper issues were found, the existence of one **Critical bug requires immediate attention before deploying to production.**

In summary, the product is nearing readiness for release, provided the **Critical bug in the Payment process is addressed and re-tested successfully** in the next version.

Improvement Suggestions

During the testing process, several issues were identified that, once resolved, could significantly improve the user experience and ensure consistency across platforms:

1. **Missing Input Validation on Newsletter Signup** ➤ The system currently accepts emails with an invalid format and displays a "Thank you for signing in" message instead of a proper error notification. Implementing robust **input validation** is necessary to ensure customer data quality and prevent failed marketing communications.
2. **Data Loss After Navigation Back (Gift Cards)** ➤ When navigating back from the payment section to the Gift Card details page, any previously entered data is not retained. Resolving this issue would significantly enhance **Usability** by avoiding the need for the user to re-enter critical information during the transaction flow.
3. **Lack of Seamless Smart Pay Integration** ➤ When attempting to use Smart Pay options (like Apple Pay or Google Pay) during checkout, the system still requires the user to fill in full credit card details manually. Enabling genuine, seamless Smart Pay functionality would greatly enhance customer convenience and accelerate the **Payment** process.

Summary: Implementing these improvements will enhance the **User Experience**, increase the **data quality** and **security** of the platform, and ensure a smoother, more consistent transactional flow for all customers.

Screenshots Of Test Cases From *TestRail* 📸

The screenshot shows the TestRail web application interface. The left sidebar is collapsed, showing navigation links like 'Project Overview', 'To-Do', 'Test Cases' (which is selected), 'Test Runs & Results', 'Milestones', and 'Reports'. A blue button for 'Add Test Case' is visible. The main content area is titled 'Test Cases' and displays a table of test cases. The first section is 'Search Engine' with 35 entries. The table columns are 'ID' and 'Title'. The test cases listed are:

ID	Title
C38	Verify book search with valid keywords
C39	Verify author search with valid keywords
C40	Verify product search on pressing Enter
C41	Verify product search on clicking search icon
C42	Verify search using free text input
C43	Verify search section displays instruction text
C44	Verify navigation to correct product page
C45	Verify system behavior for empty-search submission
C46	Verify system behavior for wrong syntax search

This screenshot is identical to the one above, showing the same 'Search Engine' section of the TestRail interface. The table of test cases is identical, listing C38 through C46.

Attachments: Screenshot 2025-11-27 130948.png Screenshot 2025-11-27 130848.png

Severity: Major

1. Search !@#\$%^&*()
2. Press “Enter button”

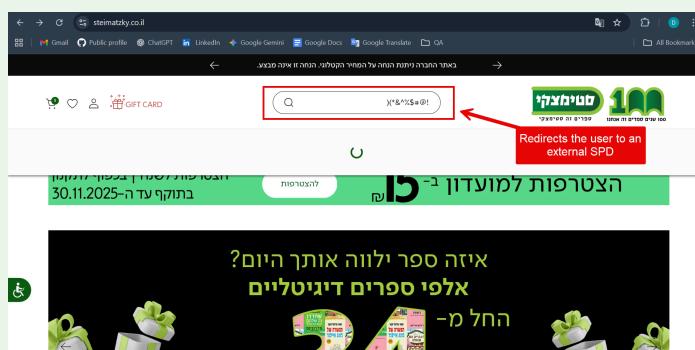

Expected result :

Show a valid “No results”

Actual result :

Redirects the user to an external SPD Hosting error page

[SP-7] Search results can't be sorted by price

Project: [Steimatzky Project](#)

Type:	Bug	Priority:	Low
Reporter:	Denis Lebed	Assignee:	Denis Lebed
Environment:	Chrome 142.0.7444.176 Firefox 145.0.1		

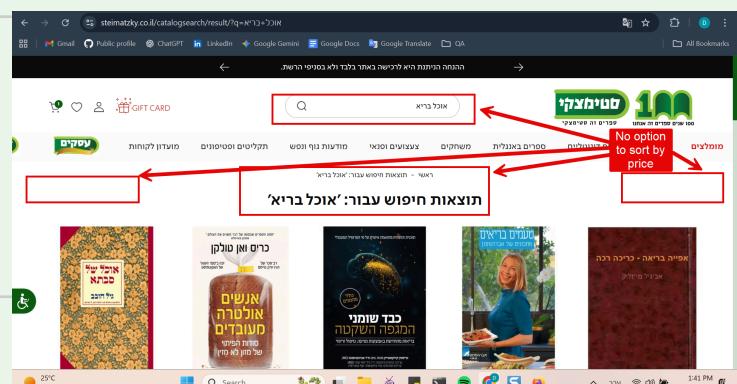

Attachments: Screenshot 2025-11-27 134136.png

Severity: Medium

1. Search a product
2. Try to sort by price

Expected result :
System allows sorting by price

Actual result :
System does not have that feature

[SP-8] System allows to change my name with repeating letter over again

Project: [Steimatzky Project](#)

Type:	Bug	Priority:	Low
Reporter:	Denis Lebed	Assignee:	Denis Lebed
Environment:	Chrome 142.0.7444.176 Firefox 145.0.1		

Attachments: Screenshot 2025-11-27 140854.png

Severity: Low

1. Log in to site
2. Go to personal account
3. Change Name to “Denisssssss”

Expected result :

System blocks names with more than 2 letters repeating itself

Actual result :

System allows to change the name

A screenshot of a web browser showing a user profile editing interface. The URL bar shows 'steimatzky.co.il/customer/account/EditInfo'. The page has a header with the Steimatzky logo and navigation links. Below the header, there's a form for editing personal information. The 'Name' field contains the value 'denisssssss', which is highlighted with a red rectangle. Other fields visible include 'Email' (lebedenmiss@gmail.com), 'Phone' (0508109819), and a 'Save' button at the bottom right.

[SP-9] System allows to change my surname with repeating letter over again

Project: [Steimatzky Project](#)

Type:	Bug	Priority:	Low
Reporter:	Denis Lebed	Assignee:	Denis Lebed
Environment:	Chrome 142.0.7444.176 Firefox 145.0.1		

Attachments: Screenshot 2025-11-27 141155.png

Severity: Low

1. Log in to site
2. Go to personal account
3. Change surname to "Lebeddddd"

Expected result :

System blocks surname with more than 2 letters repeating itself

Actual result :

System allows to change the surname

The screenshot shows a web browser with multiple tabs open. The active tab is for the 'Steimatzky Project' on the 'steimatzky.co.il' domain. The page displays a user profile edit form. The 'Surname' field is filled with 'lebeddddd' and has a red box around it. The 'First Name' field is filled with 'denissssssss' and also has a red box around it. Other fields visible include 'Email' (lebedenniss@gmail.com), 'Phone' (0508109819), and a 'Save' button.

[SP-10] System entering numbers instead of a name in the address

Project: [Steimatzky Project](#)

Type:	Bug	Priority:	Medium
Reporter:	Denis Lebed	Assignee:	Denis Lebed
Environment:	Chrome 142.0.7444.176 Firefox 145.0.1		

Attachments: Screenshot 2025-11-27 141448.png

Severity: Medium

1. Go to personal account
2. Change name to “12345” in “Address book”

Expected result :

System shows a message “Only Letters”

Actual result :

System changed name to 12345

The screenshot shows a user interface for a website. At the top, there is a navigation bar with links for "ספרים", "ספרים דיגיטליים", "ספרים באנגלית", "מוצרים", "צעצועים ופכאי", "דוחאות נסיעות ופיש", "הקליטים וטיפינויים", and "מעודן ללקוחות". Below the navigation, there is a search bar and a "GIFT CARD" button. The main content area displays a table with several rows of data. One row in the center has a red arrow pointing to the "שם" (Name) column, which contains the value "12345". To the right of this row, a message box says "ההצנת שיל" (The transfer is) and "Name chaged to 12345". The table also includes columns for "כתובות בירוח מהלך", "כתובת גיירית מהלך להשלמת", "כתובת גיירית מהלך", and "כתובות נספנות". The bottom of the page features a footer with links for "אנו ליל החרוזים והרנטה", "היקנאל של", and "היקנאל של".

[SP-11] System allows to write any word in "street" on shipping address

Project: [Steimatzky Project](#)

Type:	Bug	Priority:	Low
Reporter:	Denis Lebed	Assignee:	Denis Lebed
Environment:	Chrome 142.0.7444.176 Firefox 145.0.1		

Attachments:	<input type="checkbox"/> Screenshot 2025-11-27 143231.png
Severity:	Medium

1. Go to personal account
2. Change street to any word

Expected result :
System gives suggest streets

Actual result :
System allows any word

A screenshot of a web browser displaying the Steimatzky website. The URL in the address bar is 'steimatzky.co.il/customer/account/index#tab_address'. The page shows a search bar with the placeholder 'שנה לוי סט... שם מגורר...' and a dropdown menu titled 'כתובת בדירת מוחלט' with suggestions like 'דומestic' and 'דומestic'. Below the search bar, there are sections for 'כתובות נספנות' and 'הנתנו של'.

[SP-12] System does not accept Apple pay, Google pay

Project: [Steimatzky Project](#)

Type:	Bug	Priority:	Low
Reporter:	Denis Lebed	Assignee:	Denis Lebed

Attachments: Screenshot 2025-11-28 121551.png

Severity: Medium

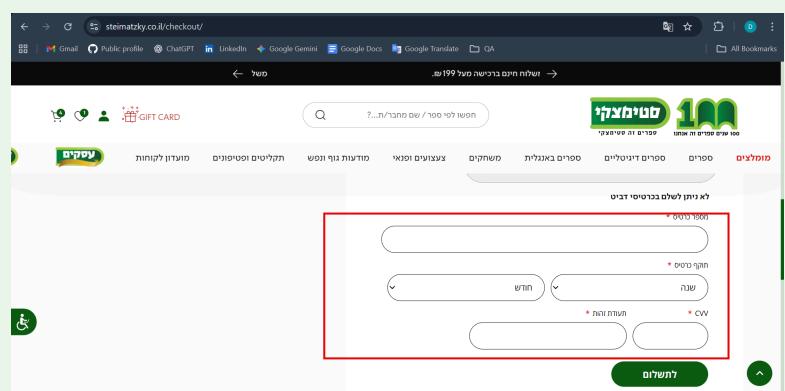

1. Open Steimatzky main page
2. Pick some books
3. Go to checkout
4. Try to pay with smartphone (Apple pay, Google pay)

Expected result :

System has smart pay

Actual result :

Must to Fill credit details

[SP-13] Gift card section accept number starting with 000

Project: [Steimatzky Project](#)

Type:	Bug	Priority:	High
Reporter:	Denis Lebed	Assignee:	Denis Lebed
Environment:	Chrome 142.0.7444.176 Firefox 145.0.1		

Attachments: Screenshot 2025-11-28 122302.png

Severity: Major

1. Go to giftcard
2. Fill all filled
3. Fill in the amount 0002

Expected result :

Message alert: "Do not accept numbers starting with zero."

Actual result :

Open credit card details to fill

The screenshot shows a web browser displaying the Steimatzky website for buying a gift card. The URL is steimatzky.co.il/buy-giftcard/giftcard/. The page features the Steimatzky logo at the top right. In the center, there is a form for selecting a gift card amount. A dropdown menu labeled 'בחר סכום' (Select Amount) is open, showing options from 50 to 1000. Below the dropdown, there is an input field with the value '0002'. A red box highlights this input field, and a red arrow points from this box to a tooltip message that reads 'accept numbers start with 000'. The rest of the page includes various navigation links and promotional banners for books and gift cards.

[SP-14] Returning from Payment to Gift Card clears all previously entered data

Project: [Steimatzky Project](#)

Type:	Bug	Priority:	Low
Reporter:	Denis Lebed	Assignee:	Denis Lebed
Environment:	Chrome 142.0.7444.176 Firefox 145.0.1		

Severity: Medium

1. Open Steimatzky gift card
2. Fill all section
3. Move to payment
4. Go back to giftcard

Expected result :

All data was remaining

Actual result :

All data is clear

A screenshot of a web browser displaying the Steimatzky gift card payment page. The URL in the address bar is "steimatzky.co.il/buy-giftcard/giftcard/". The page features a green header with the Steimatzky logo and a "100" graphic. A red box highlights a message box containing the text "Text deleted". Red arrows point from this message box to various input fields on the form, indicating that the data previously entered in those fields has been cleared. The form includes fields for "שם פרטי" (First Name), "שם משפחה" (Last Name), "טלפון" (Phone Number), "תאריך תיבת" (Delivery Date), and "זמן תיבת" (Delivery Time). There are also buttons for "SEND" and "SMS".

[SP-15] Wrong navigation by clicking on 19.9

1. Open Steimatzky main page
2. Click on 19.9 on main page

Expected result :

Navigate to 19.9 books

Actual result :

Navigate to digital books

ספרים זה סטימצקי

[SP-16] Duplicate link to club on footer

Project: [Steimatzky Project](#)

Type:	Bug	Priority:	Low
Reporter:	Denis Lebed	Assignee:	Denis Lebed
Environment:	Chrome 142.0.7444.176 Firefox 145.0.1		

Attachments: Screenshot 2025-11-29 104055.png

Severity: Low

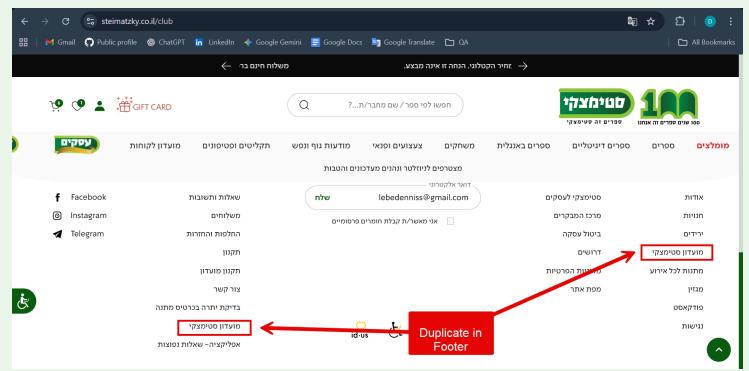

1. Open Steimatzky main page
2. Navigate down to footer
3. See duplicate link to club

Expected result :

Only one link two club

Actual result :

Two links that navigate to same page on footer

[SP-17] System allows joining the newsletter with an invalid email syntax

Project: [Steimatzky Project](#)

Type:	Bug	Priority:	Medium
Reporter:	Denis Lebed	Assignee:	Denis Lebed
Environment:	Chrome 142.0.7444.176 Firefox 145.0.1		

Attachments: Screenshot 2025-11-29 105001.png Screenshot 2025-11-29 105109.png

Severity: Major

1. Open Steimatzky main page
2. Navigate to footer
3. Join newsletter with wrong syntax

Expected result :

System will show the message : “please fill valid email”

Actual result :

System showed a thank you for signing in

The screenshot shows a browser window with the Steimatzky website. In the footer, there is a newsletter sign-up form. A red box highlights the email input field where the user has entered "lebede@gmail.com". Another red box highlights the "Send" button below it. A third red box highlights the "הזהר ששלחתי" (Please check that I sent) link at the bottom of the page. To the right of the newsletter form, a red box highlights the "Wrong email" message displayed above the newsletter sign-up area.

[SP-18] Inconsistency in English sentences regarding uppercase or lowercase letters (English books section)

Project: [Steimatzky Project](#)

Type:	Bug	Priority:	Low
Reporter:	Denis Lebed	Assignee:	Denis Lebed
Environment:	Chrome 142.0.7444.176 Firefox 145.0.1		

Attachments: Screenshot 2025-11-30 100912.png

Severity: Low

1. Open Steimatzky main page
2. Hover over English books on navigation menu

Expected result :

Uniformity in a few sentences

Actual result :

Inconsistency in English sentences regarding uppercase or lowercase letters

The screenshot shows a browser window with the Steimatzky website. The URL is <https://www.steimatzky.co.il/english-books>. The page displays a navigation menu with categories like 'ספרים באנגלית', 'ספרים דיגיטליים', 'ספרים', etc. On the right side, there is a sidebar with various book categories. A large red box covers a portion of the page content, containing the text: 'There is no uniformity: some text is in uppercase, some in lowercase, and one sentence is in Hebrew.' Red arrows point from this text to specific categories in the sidebar: 'Best Sellers', 'MANGA', 'Penguin Classics', 'BOXSET', 'CHILDREN'S BOOKS', 'NON FICTION', 'LIFESTYLE', and 'ISRAEL/JEWISH INTEREST'. The categories 'FICTION' and 'ART BOOKS' are also listed but not highlighted.

[SP-19] Long page loading time

About The Author

Denis Lebed isn't your typical author; he specializes in **reading between the lines** (of the code). While others just look for a happy ending, Denis focuses on the entire User Journey, ensuring there are no "plot holes" (**Bugs**) along the way.

His latest "release" involved comprehensive functional testing, utilizing tools like **Jira** and **TestRail** to ensure a seamless "reading" experience for every user. He believes that with the right Quality Assurance, every digital product deserves to be a **Best Seller**.

Having finished the final draft of this project, Denis is now ready to start the "**Next Chapter**" of his career. He is currently seeking a visionary "Publisher" (Company) to join, where he can utilize his talent for spotting system dramas before they go to print. 😊

"A Thriller! Not a single bug 🐞 survived." – The Daily Tester "Available for new challenges starting immediately."
